Domain Storytelling Whiteboard Kit

- The kit uses Google‘s Material Icons (https://material.io/icons). We chose icons that cover a wide range of domains.
- We optimized the layout for A4 paper format and printing with borders (do not print borderless).
- Print one-sided and cut along the marker lines.
- The last page contains labels for the arrows that you will draw by hand on the whiteboard. To reduce waste, the pages with the „actor“ icons each contain two such labels.
- Reusable, refactoring-friendly pro version:
  - Print on slightly thicker paper (100g/m²), have the paper laminated (full surface, not just borders).
  - Cut the laminated paper.
  - Use 1-2 self-adhesive magnets per card. Place them on the back of the cards, under the icons (so that they don‘t bother you when you write on the front).
  - Use a whiteboard marker to write on the cards.
